- mediGrid VO: Franck Dickmann

- pneumoGrid VO: Dagmar Krefting

- IberGrid: Ignacio Blanquer

Next meeting (phone conf): Monday October 3rd, 9am

Contents

1 News

- News from the last EGI User Community Board meeting:

  - Training certificates: Terena Certificate Service available through national federated identity providers (IP) issues certificates that can be used any any VO. The training event attendees must be affiliated with these IPs. EGI with Terena aims to broaden this service for all NGIs, for new institutes. With these certificates, users can access any production VO.

  - VO dashboard requirements to be posted before the 1st of Sept; then will proceed with the development of the VO dashboard
    * Dagmar: what about the biomed dashboard?
    * Franck: collecting requirements for biomed
    * Ignacio: the team of Goncalo Borges develops a VO dashboard
    * Franck: yes, we are in touch with them

  - About pilot jobs requirements: EGI TCB needs more precisions on which system should be part of the MW. Way forward: set up a survey and circulate it to the user communities and to the sites.

- Organization of HealthGrid 2012[1]. Dagmar: eveyrone's invited to add ideas about tutorials and workshops.

2 Technicals

- List of applications and services: OK for NL, DE and biomed to update by end of Sept.

- Technical teams

  - Franck: started monitoring the CEs of biomed;

  - On-going issues: full SE errors (change probes); generate statistical reports to identify SEs that periodically fail; assessing the myEGI portal (for now doesn't work properly for biomed, inconsistencies in the status of the SEs); redundant LFC box (discussed with Tiziana Ferrari; not possible yet because LFC is Oracle and is not catch-all).

[1]http://redmine.ebioscience.amc.nl/projects/hg2012/wiki/Start

- Ignacio: will move the LFCmanagement tools to the NA3 website; testing a new version taking into account the file replication.
- Franck: will put the link on the wiki
- Silvia: trying to see on the vlemed VO how we can use monitoring tools.
- Dagmar: medigrid, re-arranging the user support. Using DGUS today.

3 Dissemination

- 4 presentations from LSGC at the EGI TF
- press release: Dagmar may send something about German VOs

4 Funding

- Silvia: will be a Marie-Curie action coming, some calls are coming
- → Tristan makes a page on the wiki about funding, advertise it.

5 AoB

- Tristan Glatard is elected as the coordinator for Sept 2011 - Feb 2012 (no other candidate).
- Next meeting: Monday October 3rd, 9am.
